

Hand Print Bird Instructions

- Trace your hand on the construction paper and cut it out.
- Cut a beak and feet out of orange construction paper.
- Glue eye, beak, and feet onto your hand print.
- Use crayons to decorate your bird.

Parent Tip:

Learning to cut using scissors develops your child's fine motor skills and coordination. Because they are developing muscles they haven't used in this way before, it requires lots and lots of practice. Be patient and encouraging as you help them learn to use scissors.
