

Binoculars Instructions

- Cut your Paper Towel Roll in half and glue the two rolls together. (You can use paper clips to keep the rolls together while the glue dries.)
- Cut a piece of paper that fits around the rolls and glue it on top of the rolls. (This step is purely decorative and optional.)
- Decorate your binoculars with stickers and markers.
- Use a hole punch or scissors to cut a hole on the outside edge of each roll.
- Thread the string through both holes and tie a knot to secure your neck strap.
- Use your new binoculars to go on an expedition in your own backyard.
