

# Taco Instructions

- Cut yellow, green, and red construction paper into strips.
- Glue strips onto one half of the brown circle.
- Put glue on the other half of the circle and fold the circle in half to make a taco.

## Parent Tip:

Instead of cutting strips of paper, you could have your child cut their paper into different shapes. (circles for the red tomatoes, triangles for the yellow cheese, and rectangles for the green lettuce). Talk about the different shapes with your child.

Talk to your child about the types of food that are typically found in tacos. What do they like to have on their tacos? Can they add it into their taco craft?
