

Tree Instructions

- Color all 4 trees with crayons. Color one for each season. You will need a winter tree, a spring tree, a summer tree, and a fall tree.
- Cut out the trees.
- Fold all 4 trees in half lengthwise with the colored side inside.
- Take the spring tree and apply glue on half of the folded tree. Glue one side of the summer tree to the spring tree.
- Take the fall tree and glue it on top of the spring and summer tree. Continue with the winter tree.
- To finish, glue the winter and spring trees together.

Parent Tip:

Before your child starts coloring, talk to them about how trees look different in different seasons. What stays the same on all of the trees, what will look different? Talk about how right now winter is changing into spring and what we can expect to see in the coming months.
