

Caterpillar Instructions

- Use crayons on the white cardstock to make a background for your caterpillar (grass, sun, clouds, etc.)
- Write numbers on the circles with a black marker. Each circle gets one number 1-10.
- Arrange the numbered circles in order (1-10) on your background paper. Slightly overlap the circles.
- When you are happy with the placement of your circles, you can start gluing them down. Glue all 10 circles.
- Decorate the number 1 circle to look like the caterpillar's head. The number 1 will be the caterpillars nose. Add googly eyes and a mouth. You can also draw on antennae with your crayons.
- Add more details (legs, butterflies, flowers, etc.)

Parent Tip:

Have your child point and count to each circle as they glue it down. What else can your child count in their picture? What else can they count around the house?
