

Bee Instructions

- Cut out the circles and wings.
- Draw black stripes on your larger circle.
- Glue the smaller yellow circle onto the black-striped yellow circle, making sure the finger holes are at the bottom of the large circle.
- Turn the wings around so only white is showing and glue the wings on the sides of the bee body.
- Glue the googly eyes onto the bee's face and use your red marker to draw a smile.
- Fold the string in half to make a V and tape it onto the back of your bee head for antennae.
- Stick two of your fingers through the holes and have your bee walk or fly around!

Parent Tip:

Have your child try to cut out the pieces for this craft.

Cutting with scissors strengthens hand muscles and works on bilateral coordination when they have to hold the scissors in one hand and paper in the other.
