

# Egg Instructions

- Turn the egg template over so the egg is not visible.
- Use glue to stick the colored strips on the back of the template. The strips will go off the side of the paper. That is ok!
- You can overlap some strips to make your stripes different widths, put your strips horizontally or vertically, or put strips in a pattern. Be creative. Just make sure there is no white space showing.
- When you have covered the whole paper with colored strips, turn the template back over.
- Cut the egg out following the lines you can now see.
- Flip the egg back over and enjoy your beautiful design.

## Parent Tip:

Cutting out and gluing carefully in a pattern are both great ways to practice fine motor skills. This craft is also a nice way to practice color identification and recognition. Ask your child to name the colors as they glue them down.
