

Robot Instructions

- Glue googly eyes onto the head of your robot. Draw a smiley face with a marker.
- Cut out a square of white paper and glue it to the robot's stomach.
- Cut different shapes out of the foam. Stick the foam pieces, buttons, and jewels to the robot's body.
- Be creative! Your robot can look however you want it to.

Parent Tip:

Talk about all the different shapes your child can cut out and glue to their robot. Mention how many sides each shape has. Also point out the different colors of their foam pieces. Can your child name the colors and shapes as they glue them to their robot?
